NEW DELEI 3 (India);

The 18th September, 1950

S. P. JAIN,

for Registrar General, India

# NATIONAL SAVINGS

CERTIFICATES

Are now available in three different series, maturing after 5. 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post officers, District Organisers of the Smail-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simila.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 26th August, 1950—c ontd.

<sup>\*</sup> In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

<sup>†</sup>Figures not available.

Explanation of symbols used :—B.=Births; B. R.=Birth rate; C.=Cholera; S.=Smallpox; P.=Plague; F.=Fever; D. D.=Dysentery and Diarrhea; R.D.=Respiratory diseases; M.D.=Maternal deaths; D.R.=Death rate; I.D.=Infantile deaths (included in total deaths)

### REMARKS

The figures of births and deaths shown in this statement for the week ending the 26th August 1950 relate to 171 towns with an estimated population of 20,443 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 73% of the total number of towns representing 72% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 16,010 and 8,146 representing birth and death rates of 40.7 and 20.7 per thousand of population respectively.

(A) States (Parts A and B).—The data here relate to 142 towns with an estimated population of 16,912 thousands. Information about Assam, Bihar, Madhya Pradesh and West Bengal could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 71% of the total number of towns representing 68% of the total population is covered. The numbers of births and

deaths recorded in these towns were 14,011 and 7,198 representing birth and death rates of 43 1 and 22 1 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per- $\tau$  thousand of population.

(B) States (Part B).—The data here relate to 29 towns with an estimated population of 3,531 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 91% of the total number of towns representing 94% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,999 and 957 representing birth and death rates of 29·4 and 14·5 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
